**Key Projects: IOS**

**APPLICATIONS: 1:- XcelLogistix:**

Xcel Logistix has operations in 8 states; NY, NJ, CT, PA, DC, MD, IL, and CA. The company currently serves the Southern California market with west coast expansion plans for operations in San Francisco, Phoenix, and Las Vegas. Any kind of local deliveries for consumers is available now with just few steps away. The application works in following way:

- \* Check your zip code to make sure we deliver to your area.
- \* Place order by phone or online at your local store.
- \* Log into our Xcel app and provide details of store. Pick up and delivery address and any specific delivery instructions.
- \* Let your store know that Xcel will be picking up your order.
- \* Orders will be picked up and delivered before 5pm the next day.
- \* All orders placed after Noon qualify for Next Day Delivery.
- \* Orders placed before Noon qualify for same day delivery.

## **2:- KEA - Learnbird through play APP:**

In this project the technologies which I had used is Objective C, JSON (we get as the web service's response).

This IPHONE APPLICATION provides user to let them learn about the birds of different continents in form of quiz.

Every continent has several categories and every category has several subcategories.

In This App user can login through face book and twitter and normal login also.

Users can buy tokens by IN APP PURCHASE implemented in the app and can use those tokens to unlock categories and subcategories.

In this application there are two modules. Login and Skip Login.

Full App was completed by me.

This app is available on iTunes.

#### **4:-Just Walk In:**

- This is an USA IPHONE APPLICATION developed in Swift and JSON (we get as the web service's response).
- Just Walk In shows you who's hiring, where and how to apply. These are employers that want to see applications in person. Don't sit and wait for that email or phone call. Pound the pavement. It's your turn to step up and show that you are eager to apply.

It is a Bat signal for jobs. This app is ideal for employers and job seekers of restaurant jobs, retail jobs and many other industries that prefer to see applicants apply in person.

#### **6:- CIMA APP:**

This is an IPHONE APPLICATION developed in objective c.

This app is basically made for a construction business in US for personal use. The user can assign a task, punch or punch list item to other user to whom it concern.

After completing the task user posts the images and send to the assignee that the task is completed now. After that assignee mark the task as the completed one.

User can email and message to any contact in the app.

Full App was completed by me.

#### **7:-Pratham Student APP:**

This is an Indian IPHONE APPLICATION developed in swift 4.0 and JSON (we get as the web service's response).

The app has 2 modules one is student and the other is counselor.

This App enables student to get the daily update like current affairs, crash courses, new boosters etc by counselor.

For student there is the weekly quiz in the app by which they can practice for papers.

Time to time user get notifications for batches going to start and other important announcement.

Full App was completed by me.
